

# LICK WILMERDING HIGH SCHOOL CAMPUS MASTER PLAN

SAN FRANCISCO, CA

## **Project Description**

CMG collaborated with Pfau Architecture to develop a master plan for the Lick Wilmerding High School campus. The competition winning design was completed in 2003.

The new campus design adds significant program to the existing campus, including workshops, a new theater, cafeteria and classrooms. The progressive design remakes the existing campus, which was a discordant combination of buildings and remnant exterior spaces. The new design retains the spirit of the essential site elements that previously defined the exterior spaces and carried some meaning; the central grass "Field" that was the remnant of the school's turn-of-the-century playing fields was remade and "preserved" by placing new workshops underground. Other, previously remnant exterior areas were given value by restructuring the spaces and infusing them with student and faculty programs such as a student gallery, a cafeteria dining terrace and a secluded meeting place for student gathering. The resultant environment is a campus of continuity between indoor and outdoor spaces of all scales.

## **Architect**

Pfau Architecture

## **Client**

Lick Wilmerding High School

## **Awards**

2005 Green Guide, Top Ten Green Schools

2004 AIA CC Design Awards, Merit Award

2004 AIA SF Best of the Bay, Design Excellence Merit Award

2001 Winner, Juried Competition
