

MARKET SQUARE

OAKLAND, CA

Project Description

CMG designed the two courtyards, a rooftop deck and streetscape for this 200 unit, infill condominium building in downtown Oakland. The design concept was to modulate the common space with private patios, providing a range of spaces from intimate garden rooms for family and friends to larger gathering areas for groups. Each element, from screens and trellises to custom planters, is designed to meet these goals. A vibrant and exotic garden atmosphere is achieved with a lush palette of tropical plants, lending a unique character to the building and a relaxing environment for the residents.
